3. Use your authenticator app to scan the QR code and store the token on your device. Once you have scanned the code successfully, press the 'Verify Code' button to proceed.

Please do not click "Verify Code" until the token is showing on your authenticator app.

If the setup process is not working - technical Support can be provided by your Designated Organization Contacts, [Regional Healthcare Coalition](#) or preparedness@vhha.com

Setup Multifactor Authentication

Setup Multifactor Authentication

Google Authenticator Setup

Multifactor authentication is required for your account. You may use any authentication app with TOTP tokens, but we recommend and support Google Authenticator. To set up Google Authenticator, first install the Google Authenticator app from the App Store (iOS) or Google Play (Android). Open the app and tap the '+' button (or 'Get Started' if it's your first time), then choose 'Scan a QR code.' Allow camera access if prompted, and point your phone at the QR code displayed below. [You may also follow the full Google guide here.](#) The app will automatically add the account and begin generating a 6-digit verification code that refreshes every 30 seconds. Once this code has been generated, click the 'Verify Code' button below and enter it on the next page to login.

You may also enter this key into your authenticator app: **VRLDDIYJNDQHLLAN**

 or [Cancel](#)

4. Enter the 6-digit code provided by your Authenticator App and click “Verify”.

Verify Multifactor Authentication

Verify Multifactor Authentication

Verify Access Code

Please enter the six digit code from your authenticator app below. If you are experiencing issues with authentication, please [use this guide](#) or contact preparedness@vhha.com for support.

Verify Token:

5. Once MFA has been set up, if you still have access to your Authenticator App and need to change devices or Authenticator App, you can reset your MFA in your Account Settings. This will log you out of VHASS and force you to re-enter your credentials and set up MFA again.
